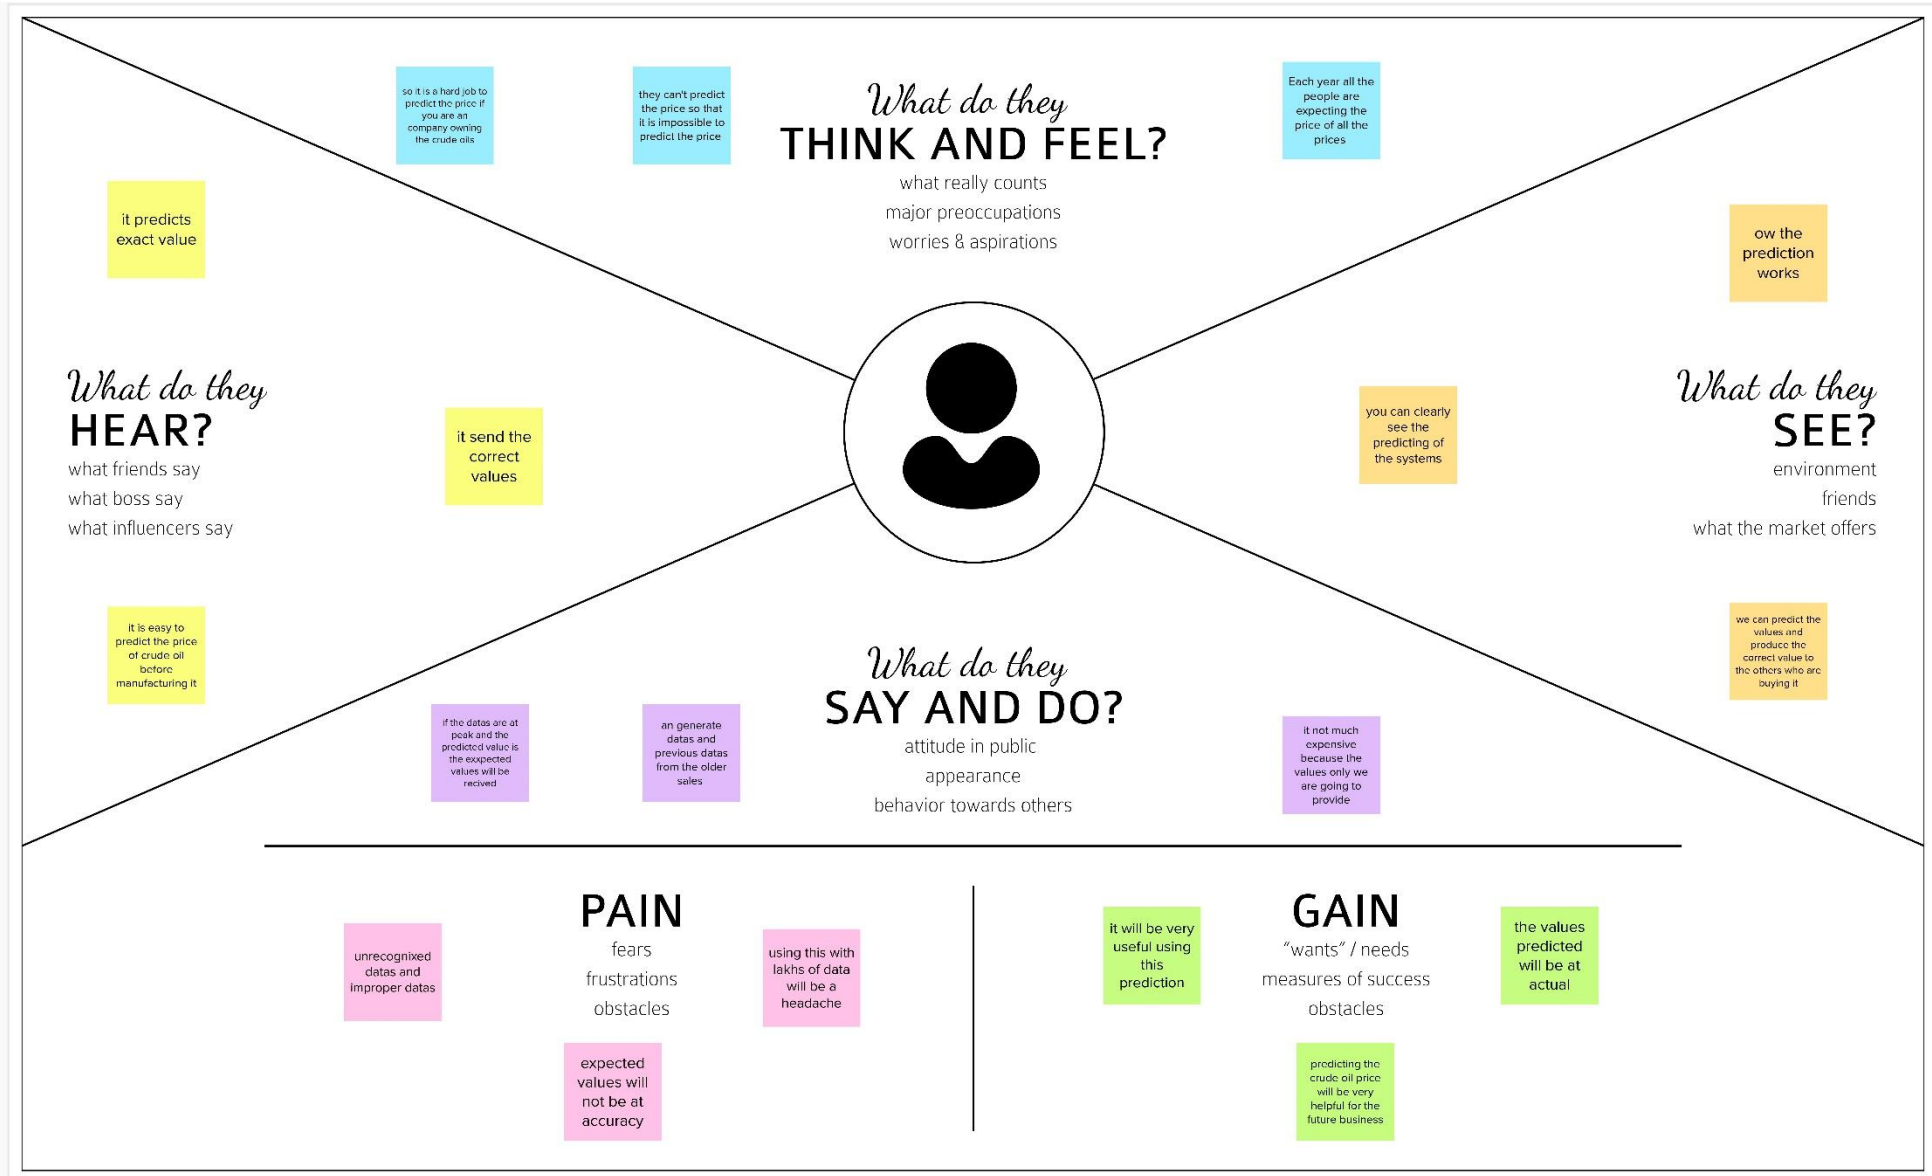
Project Name	Crude Oil Prediction
Maximum Marks	4 Marks

Empathy Map Canvas:

An empathy map is a simple, easy-to-digest visual that captures knowledge about a user's behaviours and attitudes.

It is a useful tool to helps teams better understand their users.
Creating an effective solution requires understanding the true problem and the person who is experiencing it. The exercise of creating the map helps participants consider things from the user's perspective along with his or her goals and challenges.



so it is a hard job to predict the price if you are an company owning the crude oils
they can't predict the price so that it is impossible to predict the price
What do they
THINK AND FEEL?
what really counts
major preoccupations
worries & aspirations
Each year all the people are expecting the price of all the prices
it predicts exact value
ow the prediction works
What do they
HEAR?
what friends say
what boss say
what influencers say
it send the correct values
you can clearly see the predicting of the systems
What do they
SEE?
environment
friends
what the market offers
it is easy to predict the price of crude oil before manufacturing it
we can predict the values and produce the correct value to the others who are buying it
What do they
SAY AND DO?
attitude in public
appearance
behavior towards others
if the datas are at peak and the predicted value is the expected values will be recived
an generate datas and previous datas from the older sales
it not much expensive because the values only we are going to provide
PAIN
fears
frustrations
obstacles
unrecognixed datas and improper datas
using this with lakhs of data will be a headache
expected values will not be at accuracy
GAIN
"wants" / needs
measures of success
obstacles
it will be very useful using this prediction
the values predicted will be at actual
predicting the crude oil price will be very helpful for the future business
