

What do they
THINK AND FEEL?

what really counts
major preoccupations
worries & aspirations

What do they
SAY AND DO?

attitude in public
appearance
behavior towards others

What do they
HEAR?

what friends say
what boss say
what influencers say

What do they
SEE?

environment
friends
what the market offers

PAIN

fears
frustrations
obstacles

GAIN

“wants” / needs
measures of success
obstacles

so it is a hard job to predict the price if you are an company owning the crude oils

they can't predict the price so that it is impossible to predict the price

Each year all the people are expecting the price of all the prices

it predicts exact value

ow the prediction works

it send the correct values

you can clearly see the predicting of the systems

it is easy to predict the price of crude oil before manufacturing it

we can predict the values and produce the correct value to the others who are buying it

if the datas are at peak and the predicted value is the exxpected values will be recived

an generate datas and previous datas from the older sales

it not much expensive because the values only we are going to provide

unrecognixed datas and improper datas

expected values will not be at accuracy

using this with lakhs of data will be a headache

it will be very useful using this prediction

the values predicted will be at actual

predicting the crude oil price will be very helpful for the future business
